zLinkFM™ Mobile Platform

- Immediate Access to Facility Management Data "Anytime Anywhere"
- Available for Supported - iOS and Android Mobile Devices
- Interactive CAD Drawings and Business Data

zLinkFM™ Mobile Platform takes Facility Management Solutions to the next level

by providing leading edge technology that integrates facility drawings, databases, and the web; all at the touch of your fingertips.

Would you like to have access to your facility CAD drawings and data on demand? Are you looking to enhance employee productivity and provide greater satisfaction through expanded mobility?
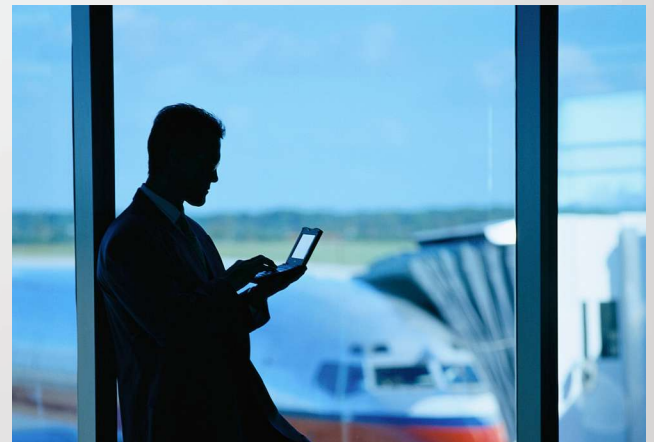

We have an app for that! Our mobile platform can help you achieve that.

The zLinkFM™ mobile platform provides a physical synchronization link between the desktop zLinkFM™ application and the handheld tablets and smartphones running zLinkFM™. This allows facility managers and others within the organization to move about the facility with all the necessary facility CAD drawings and data needed to carry out a vast variety of tasks.

zLinkFM™ Mobile FM Value Proposition

- Executive decision support tools and metrics available any place, any time, and on demand.
- Real-time information for proactive decisions.
- Improved employee productivity consistent with mobile workforce.
- Common set of facility drawings and data on a secure and user friendly iOS™, Android™ Tablet and Smartphone devices.
- Operational support for maintenance functions delivered at the work point.

Flexible Organizational Strategies

zLinkFM™ Mobile Platform offers flexibility to implement organizations strategies for enterprise-wide applications. It allows choices such as:

- Support for employer provided mobile devices or B.Y.O.D (Bring your own device), implementation strategies.
- Synchronize data posted on your intranet or hosted and cloud environments
- Integrate zLinkFM™ Mobile Platform and your legacy enterprise systems and existing database.

Broad Support for Emerging Technologies

Since mobility is an evolving area with emerging technologies, zLinkFM™ Mobile Platform is developed to adopt technological advancements.

- iOS and Android based smartphones and tablets
- Capability to interact with building monitoring and control systems, sensors, barcodes and GPS data in real time.
- Evolving User Interface based on touch, video, and context.

Facilities Management Gone Mobile

zLinkFM™ Mobile Platform; simply put is not a migration of the desktop program, but a whole new approach to the way we do work. Our mobile platform provides a swift interactive means for business processes that enhances a mobile-centric workplace, offers flexibility in implementing organizational strategies, and supports advancement in emerging technologies.

Mobile-Centric – Changing the way we think

Our mobile platform changes the way we think of how to do work. It allows you to use the smart devices' capabilities to enhance your experience in working with important FM information. Our mobile platform also:

- Capitalizes on the capabilities of mobile devices and applies them to the whole life cycle of FM tasks.
- Makes the application so intuitive that employees will hit the ground running.
- Allows employees to carry complete site documentation with them and are able to use it immediately as they work.
- Lets managers and other team members be geographically dispersed and yet coordinate activities with the relevant information on hand.
- Reduces the number of steps, time, and costs to handle tasks and streamlines business processes.
