Space Management & Planning

Improve utilization of space and productivity by linking employee, space and asset data with floor plan drawings.

- Manage and optimize space utilization
- Monitor key performance metrics
- Dynamic allocation of workspaces
- Visual planning scenarios to facilitate executive decision-making

zLinkFM™ Space Module dynamically links your CAD drawings to a powerful relational database. Make a change in the database; the changes automatically get transferred to the drawing. Reconfigure the floor plan; the database automatically re-calculates the new square footage. Add new data, the database expands to include new information. Effortlessly track space utilization.

- Integrated Architectural Plan-centric Space Planning Solutions
- Dynamically Linked CAD Drawings and Space Database
- Mobile “Anywhere Anytime” Access to Space Data
- Enterprise-wide Space and Asset Management

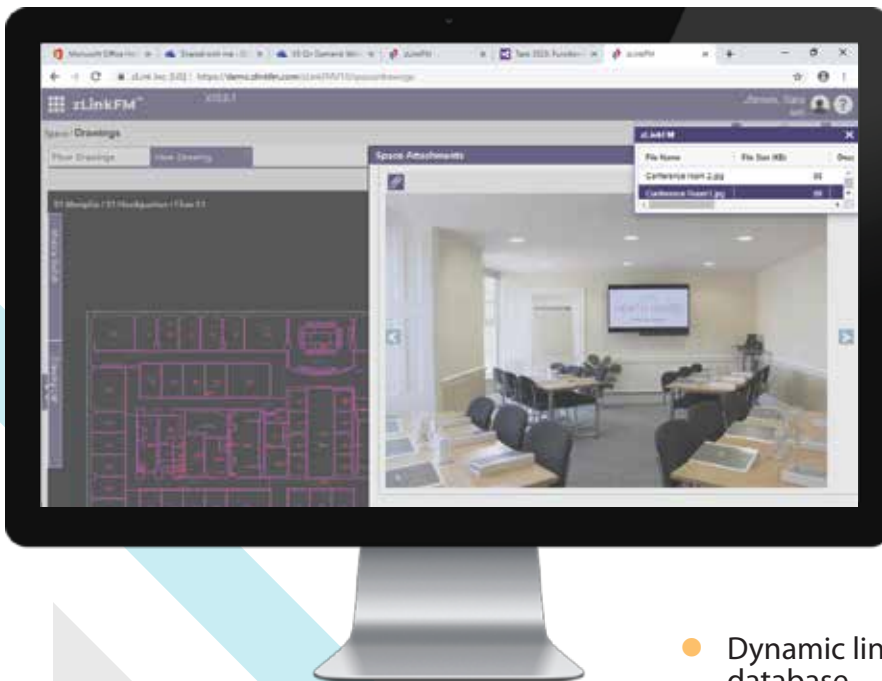

zLink, Inc. is a leading provider of facilities information systems

zLink, Inc. is a leader in providing solutions that integrate facilities drawings, data, and the web:

- Quick ROI and cost savings
- SaaS solutions
- Support services
- Integrated asset & facility management in one web-based solution
- Fast Wireless FM Mobile Access

Coupling with architectural floor plans allows accurate management metrics, increased operational efficiency, and easy visualization of space to facilitate utilization and management.

- Easily monitor and track the effective use and cost associated with real estate space
- Develop planning scenarios to define and manage future requirements
- Accurate extensive space data and flexible space reporting
- Allocate and optimize space among many departments and do accurate cost accounting

- Dynamic linkage between drawing and space database
- Easily get square footage measurements before remodeling and designing projects
- Enable enterprise-wide space scheduling
